

FREE TESTING FOR UTAH RESIDENTS

Heavy Metals (for private well owners)

Pesticides and Insecticides (including 2,4-D and pyrethroid exposure)

Consumer Products (including exposure to phthalates in certain plastics)

Why participate?

- Learn ways your household can reduce exposure to different chemicals.
- Compare your results with the greater Utah and U.S. populations.

Who are we looking for?

- People who drink from private wells
- People who use sprays when they camp or garden
- Anyone interested in learning their exposure to household products

How does it work?

- Answer a short survey about your home and your daily habits.
- Give us a sample of your urine to test.
- In total, this will take about 20 minutes.

All testing is free and confidential.
